Vision Clearance Area

The minimum distance establishing the size of the vision clearance area shall be 30 feet measured from the curb lines of the streets, except that at intersections including an alley, the minimum distance shall be 15 feet measured from the curb lines of the street and right-of-way lines of the alley.

No fence, wall, or hedge exceeding 2.5' shall be located in any vision clearance area unless such fence, wall, or hedge shall be more than 80 percent open.
