

Department of Building Safety

Notice of Change

FROM: Chadley Root, CBO

SUBJECT: Change in the Conveyance Permitting and Inspection Program

DATE: February 9, 2021

The City of Louisville has administered the conveyance permitting and inspection program in Louisville since January 1, 2012. Effective March 1, 2021 the City of Louisville will no longer contract with a Licensed 3rd party to schedule and complete conveyance plan reviews or inspections for regulated conveyances located within the City of Louisville.

Beginning March 1, 2021 the State of Colorado Division of Oil and Public Safety ([OPS](#)) will assume direct regulation of applicable conveyances located in the City of Louisville.

Conveyance owners are responsible to arrange the required annual conveyance inspection with any licensed 3rd party inspector. A list of licensed 3rd party inspectors can be found [here](#). Further communication from OPS will be forthcoming. In the meantime, please feel free to contact them and they will assist you with any questions that you may have. Contact information is below.
