

Responsible Wildlife Viewing

- Maintain a respectful distance from wildlife, especially near nesting areas and feeding sites
- Heed closures for natural resource restoration and critical wildlife habitat
- Stay on the trail to minimize wildlife and habitat disturbance

Bird Conservation Tips

- Plant native vegetation
- Keep house cats indoors
- Purchase shade grown coffee
- Increase window visibility with bird tape, stickers, or fishing line to reduce collisions
- Join local birding organizations

Hecla Lake Open Space Rules & Regulations

- Hecla Lake Open Space is open daily one hour before sunrise to one hour after sunset
- Stay on the trail to minimize wildlife disturbance and vegetation trampling
- No swimming or recreational activities are allowed in the lake
- Dogs must be on leash and under physical control at all times
- Dog waste must be picked up and properly disposed of

Open Space Mission

To conserve and restore Open Space through land acquisition and management for the protection of natural and cultural resources and provide opportunities for education, volunteering and appropriate passive recreation.

Bird Checklist

at Hecla Lake Open Space

Hecla Lake Open Space

Hecla Lake Open Space features a 5.8-acre lake and 10 surrounding acres of bird habitat. Over 150 bird species have been documented at Hecla Lake Open Space to date, but many more species are possible.

The lake and shoreline attract migratory waterfowl and shorebirds. Great Blue Herons regularly use the island platform for nesting. Brushy upland areas are used by resident songbirds for breeding and as a stopover point for migrating songbirds.

Bird Checklist

This checklist is designed to help visitors record birds they observe while recreating at Hecla Lake Open Space. It was created using citizen science data from eBird.org and Open Space staff records. The checklist includes the species of wild birds that have been seen here since 2016

The taxonomic sequence and nomenclature follow the American Ornithological Society's Checklist of North American Birds.

Space is provided for recording the presence or number of each species found and general trip information. You can track and record your bird sightings on eBird.org.

If you find a species not on the current list, please email us at OpenSpace@LouisvilleCo.gov
