Regular physical activity is enjoyable, safe, and healthy for most people. However, some individuals may have health-related risks that might be aggravated by participation in a physical-activity program, and, as a result, might require them to check with their physician prior to embarking on a physical-activity program. To help determine if there is a need for you to see your physician before beginning an exercise program, please answer the following questions carefully. All information will be kept strictly confidential.

I. PRE-ACTIVITY SCREENING QUESTIONS

Yes No

- 1. Has your physician ever told you that you have a heart condition?
- 2. Do you experience pain in your chest when you are physically active?
- 3. In the past month, have you experienced chest pain when not performing physical activity?
- 4. Do you lose balance because of dizziness or do you ever lose consciousness?
- 5. Do you have a bone or joint problem that could be aggravated by a change in your level of physical activity?
- 6. Is your physician currently prescribing medications for your blood pressure or a heart condition?
- 7. Do you know of any other reason why you should not participate in a physical-activity program?
